

Technical Assessment

TCW STRATEGIES
BUILDING POWER THROUGH INNOVATION

Leaders of today's progressive organizations are looking to build or modernize their data operations; to enhance decision-making, supercharge outreach campaigns, and advance their missions.

Starting on the right path is critical.

Get Started with Our Technical Assessment Service

Our mission at TCW Strategies is to empower labor unions and progressive non-profits with services that leverage data and build power. Our *Technical Assessment* service is a one-time, multi-week, guided partnership led by a team of dedicated industry experts who understand the unique needs of labor unions and progressive non-profits.

Together, we work to find the right path forward, identifying the necessary steps to implement a modern, tailored data solution that aligns with your organization's vision, mission, and supports its work.

Understand The Value of Your Data

Valuable data is often locked away in decentralized systems managed by different teams. We meet with your key stakeholders to understand the overall data flow in your organization and identify challenges preventing you from leveraging data to advance your mission.

We evaluate your tools and systems to understand the work necessary to implement automated data integrations.

- 2-3 Week Timelines
- Facilitated stakeholder learning sessions
- Platform integration review
- Final assessment report
- Detailed implementation roadmap

A Roadmap To Modern Data Infrastructure

Our team of experts will deliver a clear roadmap for implementing and utilizing an improved data infrastructure.

This includes recommendations, the scope of work for integrating data-generating systems, and specific data-driven solutions to help your teams achieve their goals.
